Position Overview
At PNC, our people are our greatest differentiator and competitive advantage in the markets we serve. We are all united in delivering the best experience for our customers. As an QA Lead within PNC's Testing Center of Excellence organization, you will be based in Cleveland, OH or Pittsburgh, PA.
IDEAL SKILL SET: 10+ years total experience of software testing and QA. 5+ years in building automation testing framework and substantial experience with Data Warehouse testing/QA
Strong fundamental knowledge of Data Warehouse (tables, primary and foreign keys, indexes, partitions, views, referential integrity, functions, triggers, stored procedures and packages)
Hands on test experience with DB2 SQL, ETL, Data Model, Data Warehouse & advanced SQL skills a must.
Experience with Scrum methodology
Strong analytical problem-solving skills, good verbal and communication skills.
Able to set up and implement automation testing practice in data project independently.
Build and update automated release regression test scripts
Write test plans, scripts and scenarios using QA best practices.
Job Profile
Operating in a global delivery model, brings strategic direction to testing and acts as the subject matter expert for both the quality discipline and a line of business domain(s).
Leads the review of testing artifacts throughout the product life-cycle to ensure appropriate sign off and prioritization of testing work.
Including coordinating test strategy, scripting and defect resolution.
Including ensuring early engagement with internal partners and proactive planning to ensure quality is a core area of focus early in the product lifecycle.
Take accountability for quality standards in the development, implementation and upkeep test scripts and opportunities for automation of testing products.
Developing meaningful management metrics that help to gauge project health.
Identify trends and opportunities for continuous improvement in product release.
Core Competencies
Manages Risk - Working Experience Assesses and effectively manages all of the risks associated with their business objectives and activities to ensure activities are in alignment with the bank's and unit's risk appetite and risk management framework.
Customer Focus - Extensive Experience Knowledge of the values and practices that align customer needs and satisfaction as primary considerations in all business decisions, and ability to leverage that information in creating customized customer solutions.
Job Specific Competencies
Accuracy and Attention to Detail - Extensive Experience Understanding of the necessity and value of accuracy and attention to detail; ability to produce information with high levels of accuracy.
Analytical Thinking - Extensive Experience Knowledge of techniques and tools that promote effective analysis and the ability to determine the root cause of organizational problems and propose alternative solutions that resolve the problems.
